Throughout any given workday, employees use their hands to write up a report, shake hands with a new client, open doors and much more. All of these activities expose hands to harmful germs and bacteria.
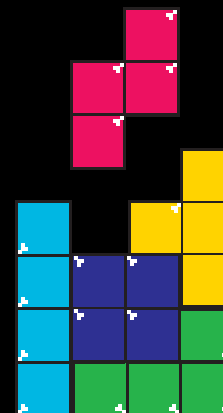

Proper hand hygiene compliance is key to a healthier work place and it can reduce absenteeism and associated costs by 40%.

IT'S DANGEROUS TO GO ALONE! TAKE THIS.

By placing hand sanitizer in strategic locations throughout the office and other high traffic areas, you can encourage employees to improve their hand hygiene and make the office a healthier working environment.

Workers who are encouraged to use hand sanitizer 5x daily are 60% less likely to get sick.

Placing individual hand sanitizers at desks keeps hand hygiene within reach.

Only 66% of Americans say they always wash up after using a public restroom.

A single doorknob could be the cause of a widespread illness in the workplace.

One of the germiest hotspots in an office is the breakroom and kitchen.

Sanitizing stations in high traffic areas will help stop the spread of germs and improve the image of any areas they're placed in.
